•

+

Proj. (stat. ⊕ syst.)

Asimov Dataset

The plot displays the 95% CL sensitivity to C_{ll1}/Λ^2 [TeV]⁻² for four different choices of variables. The x-axis ranges from -150 to 150, and the y-axis lists the variables: combined, 3, 2, and 1. The legend indicates that the projection includes both statistical and systematic uncertainties (stat. ⊕ syst.) for the Asimov Dataset. The table on the right provides the numerical values for the total, statistical, and systematic uncertainties for each variable choice.

Variable of choice	total	stat.
s_T	0.000 +22.000 -73.000	+8.000 -58.000
3	0.000 +25.000 -75.000	+19.000 -70.000
2	0.000 +28.000 -79.000	+12.000 -63.000
1	0.000 +37.000 -88.000	+11.000 -61.000
